

«Any fool can write code that a computer can understand. Good programmers write code that humans can understand.»

- Martin Fowler

Domain-Driven Design – Tore Havsø Sæstad

25.04.2018 – Appear TV

Agenda

- DDD Europe 2018
- Meetup groups
- What is DDD?
- Patterns
- When to use DDD?
- Interested in more?

- Domain-Driven Design Norway
- Oslo Software Architecture (OSWA)
- Oslo PostgreSQL User Group
- DEVOPS NORWAY
- Oslo Embedded Software Meetup (just woke up)
- Oslo C++ Users Group (sleeping)

“... a haphazardly structured, sprawling, sloppy, duct-tape-and-baling-wire, spaghetti-code jungle.”

Big Ball of Mud – Foote, Yoder – 1997

THE WORLD SEEN BY AN "OBJECT-ORIENTED" PROGRAMMER.

Domain complexity
(essential)

Technical complexity
(accidental)

Tackling complexity in the heart of software

One ubiquitous language per bounded context

- Stream
- Input
- Output
- Source
- User
- Filter
- Service
- Representation
- Channel
- Coder
- Language
- Subtitle
- ID
- Segment

Domain model

- Eric Evans' keynote on DDD Europe 2018
- Joda-Time (Java Date and Time library)
- January 31, 2018 + one month? February 28, 2018
- January 31, 2018 + two months? March 31, 2018
- January 31, 2018 + one month + one month? March 28, 2018
- Calculate Thanksgiving Day (Fourth Thursday in November)

Patterns?

- Tactics
 - Value objects
 - Entities
 - Aggregates
 - Services
 - Factories
 - Repositories
 - CQRS
- Strategy
 - Context maps
 - Event storming
 - Bounded context
 - Ubiquitous language
 - Domain model

Value objects

```
const int day = getDay();
```

Value objects

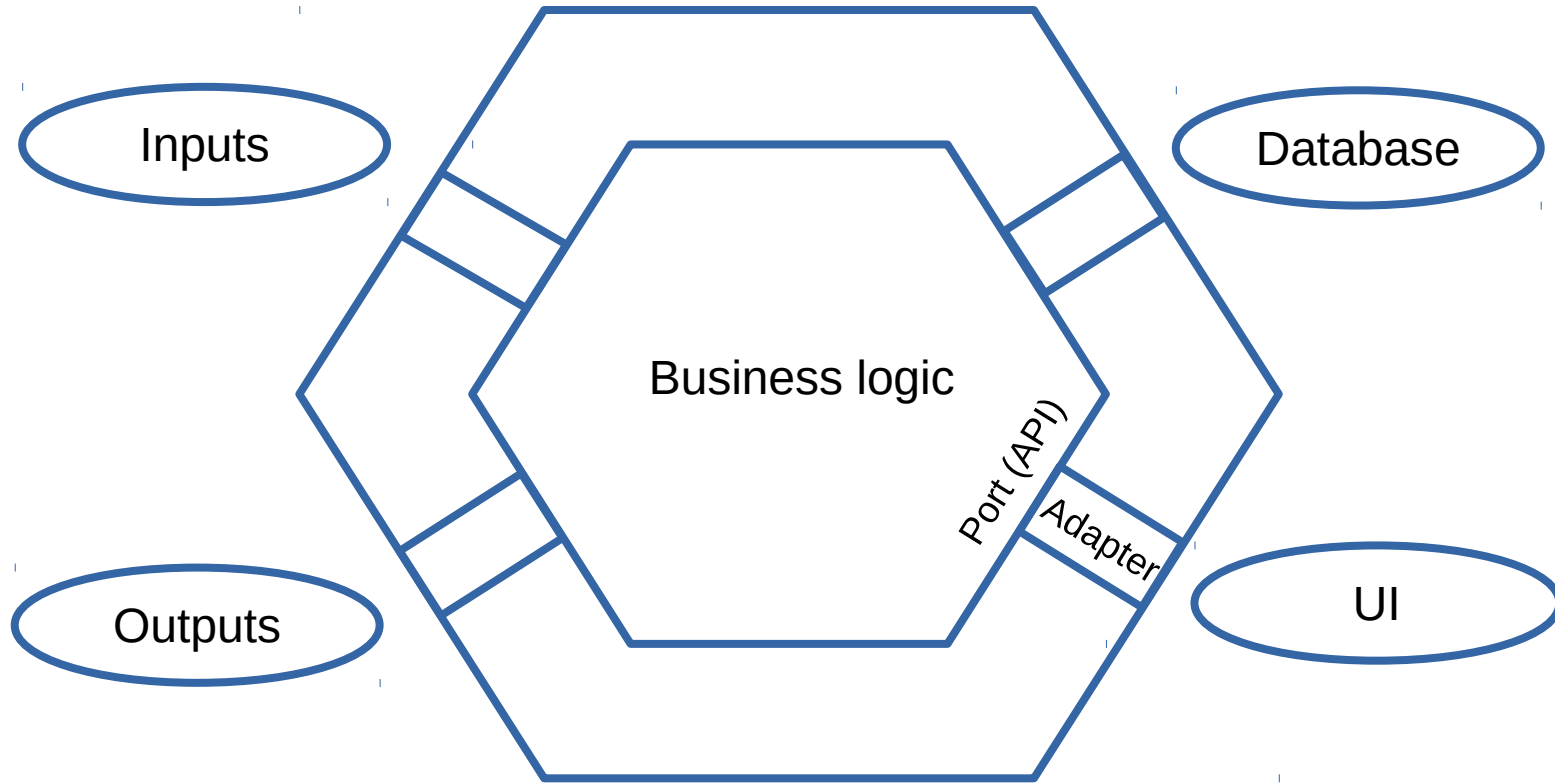

```
using Day = int;  
const Day day = getDay();  
if (day >= 1 && day <= 31)  
{  
    // continue processing here ...  
}
```

```
class DayOfMonth
{
public:
    DayOfMonth(const int day)
        : m_day(day)
        {
            const bool dayIsValid = (day >=1 && day <=31);
            if (!dayIsValid)
            {
                throw std::invalid_argument("Invalid day: " + std::to_string(day));
            }
        }

private:
    const int m_day;
};

const DayOfMonth dayOfMonth(getDay());
```

Ports and adapters

Complex

- Probe
- Sense
- Respond

Emergent practice

DDD

Complicated

- Sense
- Analyze
- Respond

Good practice

DDD

Disorder

Chaotic

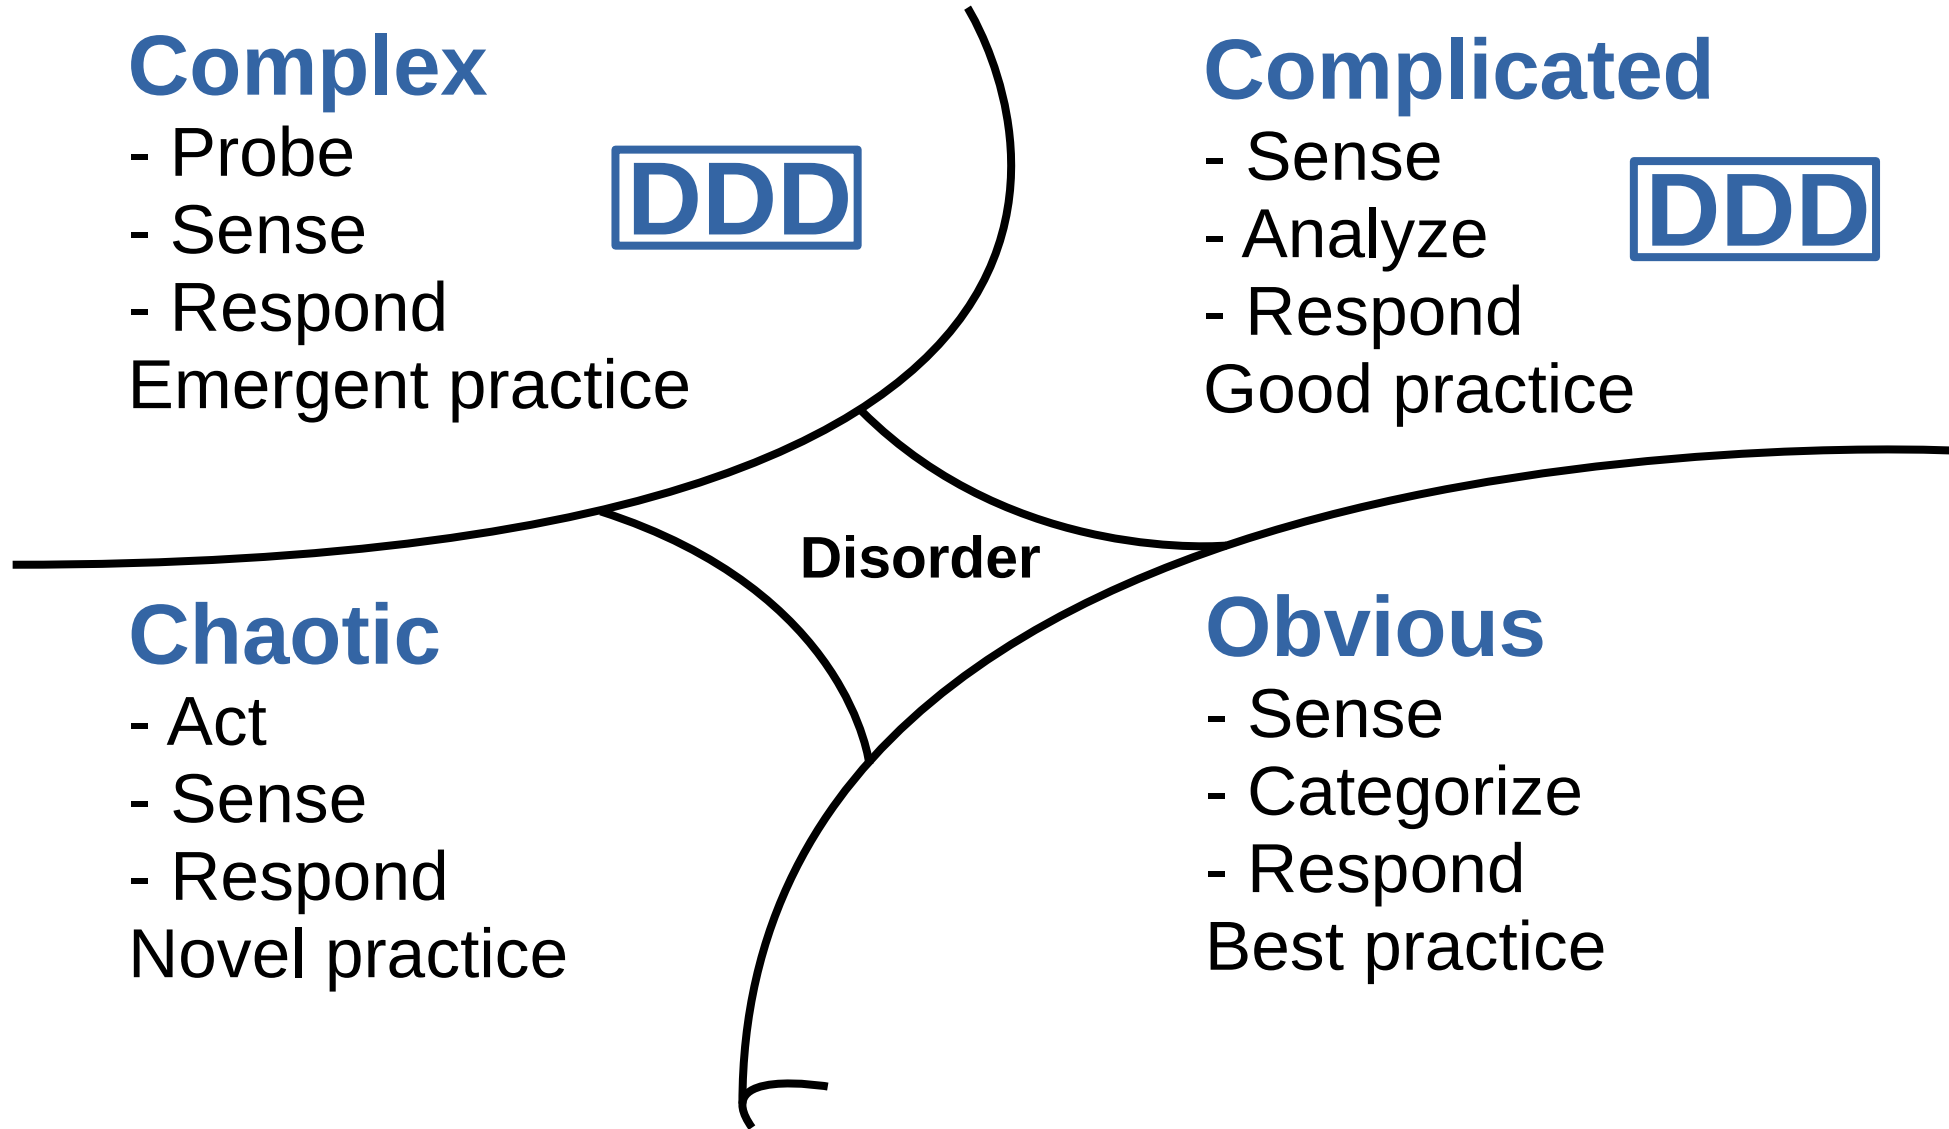

- Act
- Sense
- Respond

Novel practice

Obvious

- Sense
- Categorize
- Respond

Best practice
